

Wellness Program

Our Wellness Program includes two plans designed to fit the needs of you and your horse(s): Basic and Performance.

Wellness examinations, power dentistry, essential vaccinations, and fecal/sand tests are included in each level of care. These plans allow you to lock in the current rate for preventative care services and procedures, ensuring your horses get the recommended care throughout the year. Once you are enrolled, you may schedule your services at any time during your plan year. To enroll, please select the plan which best suits your needs, then complete, sign, and return the application, terms and conditions, along with your payment. Payment must be made in full by your first appointment.

Basic Plan: This plan is designed for the pleasure horse which does not leave the farm, and covers all essential preventative care. A wellness exam with nutritional and parasite control consultation is included. Routine power dentistry with sedation, core vaccinations (which protect your horses against viruses and disease that comes to them, e.g. via mosquitoes, etc.), and two fecal/sand tests are also included.

Performance Plan: This plan is designed for the travelling/performance horse. In addition to the services included in the Basic Plan, your horse will also receive a Coggins test, an additional Potomac Horse Fever booster, and bi-annual Flu/Rhino vaccinations.

*In addition, you will receive a 10% discount on future, additional examination fees during your Plan Year.
